Certificate of Participation

Paper ID: 4984

This is to Certify that

Mr./Mrs./Dr./Prof.

Dr. Santosh Sharma

has presented a research paper titled **Natural Fibre-Reinforced Composites:and Its Applications-
A Review**

in 7th International Conference "**Shaastrarth-2022**" on Computational Optimization,
Modelling and Simulation: Recent Trends and Challenges on 25 & 26 March 2022,
organized by **Rungta College of Engineering and Technology, Bhilai.**

Dr Manisha Agrawal
Professor, RCET, Bhilai
Co Convener Shaastrarth 2022

Dr Rakesh Himte
Professor & Head, Mech. Engg., RCET, Bhilai
Co Convener, Shaastrarth 2022

Dr. Mohan Awasthy
Principal, RCET Bhilai
Convener, Shaastrarth 2022

Shri Santosh Rungta
Chairman SRGI

Rungta College of Engineering & Technology, Bhilai, Chhattisgarh

Mukesh Kumar Chandrakar

Bhilai Institute of Technology, India

ABSTRACT

Photoplethysmograph signal carries very useful cardiac information such heart rate, oxygen saturation level, blood pressure, and diabetic condition. Blood pressure is one such cardiac information that can be estimated by extracting features of PPG signal. Cuff-less blood pressure measurement using photoplethysmograph (PPG) signal is one of non-invasive methods. It allows continuous monitoring of blood pressure in simple, rapid, and low-cost mode. This chapter segregates PPG features and re-investigates their effectiveness in terms of BP measurement. Machine learning algorithm based on K-nearest neighbour is applied for classification of samples. MIMIC II multi-parameter database of ECG and finger PPG is applied on the KNN classifiers. Classification accuracy comes to 92%, and correlation between predicted and observed SBP and DSB are 0.89 and 0.85, respectively.
