

7.1.2 The Institution has facilities and initiatives for

2. Management of the various types of degradable and non- degradable waste

2. Management of the various types of degradable and non-degradable waste

Degradable and non-degradable waste management in our college is accomplished either by in-house utilization/ consumption or by outsourcing its collection and disposal to an authorized agency. Sufficient dustbins have been provided across the campus for collection of the solid waste generated at different sources in the college.

(A) Sewerage Treatment Plants (STP)

CSIT Durg proudly operates a Sewage Treatment Plant (STP) of **capacity 100 KLD** on its campus, effectively treating wastewater to maintain environmental sustainability and promote resource conservation. The treated water from the STP finds versatile applications across the college premises, including gardening, irrigation for landscaping, and general cleaning purposes. This initiative underscores CSIT Durg's commitment to eco-friendly practices and efficient utilization of resources, contributing to a greener and cleaner campus environment.

(B) **Dust Bin**

Degradable and non-degradable waste management in our college is accomplished by in-house utilization/ consumption by its collection and disposal. Sufficient dustbins have been provided across the campus for collection of the solid waste generated at different sources in the college. These bins are colour coded specific to a category of waste, viz.

Green — Biodegradable, organic waste like cooked food, vegetables, fruit, leaves etc.

Blue — Recyclable waste like paper, cartons, cans, metallic items etc.

Red — non-degradable waste like glass, blades, expired medicine, bandages etc.
